Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 14 is rejected under 35 U.S.C. 102(e) as being anticipated by Murashima 6,088,667.

As to claim 14, Murashima teaches a method for vector quantizing speech signal using code vectors, represented in frames by generating samples and framing the samples into groups and performing the conventional prediction error coding, where the prediction error coding includes, storing the prediction value of the past sample and using this value for predicting the value for the current frame sample that will be subtracted from the actual value and quantizing the difference (Fig.1; Col.4, lines 11-28; Col.5, lines 28-35).

Claim objection

Claim 14 objected to because of the following informalities: the steps c and d are similar and repititve. Appropriate correction is required.

Allowable Subject Matter

Claims 1-4, 6-13 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

The claims are allowed for incorporating the allowable limitation, which is where prediction performed predicts that all sample value in the frame are equal to the first value sample in the frames.

Response to Arguments

Applicant's arguments, see page 10, filed on 2/12/2004, with respect to claims 1, 7 and 11 have been fully considered and are persuasive. The rejection of claims 1-4 and 6-13 has been withdrawn.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
